United Nations A/RES/58/3

General Assembly

Distr.: General
17 November 2003

Fifty-eighth session
Agenda item 60

Resolution adopted by the General Assembly

[*without reference to a Main Committee (A/58/L.5 and Add.1)*]

58/3. Enhancing capacity-building in global public health

The General Assembly,

Recalling the United Nations Millennium Declaration,[1] adopted by heads of State and Government at the Millennium Summit of the United Nations, and the development goals contained therein, in particular the health-related development goals, and its resolutions 55/162 of 14 December 2000, 56/95 of 14 December 2001 and 57/144 of 16 December 2002,

Bearing in mind World Health Assembly resolutions 48.13 of 12 May 1995, 54.14 of 21 May 2001 and 56.28 and 56.29 of 28 May 2003,

Recognizing that Member States have to strengthen their efforts to halt and begin to reverse, by 2015, the spread of HIV/AIDS and the incidence of malaria and other major diseases,

Reaffirming its Declaration of Commitment on HIV/AIDS,[2]

Recognizing that the globalization of trade and increased international travel have increased the risk of a rapid worldwide spread of infectious diseases, posing new challenges to public health,

Noting with concern the deleterious impact on humankind of HIV/AIDS, tuberculosis, malaria and other major infectious diseases and epidemics, and the heavy disease burden borne by poor people, especially in developing countries,

Welcoming the current success of the affected countries in combating the severe acute respiratory syndrome, the first severe infectious disease to emerge in the twenty-first century, the political commitment and strong leadership shown in the affected countries and the role of the World Health Organization in controlling the epidemic, while mindful of the fact that the fight against the severe acute respiratory syndrome and other epidemics is far from over,

Convinced that strengthening public health is critical to the development of all Member States, and that economic and social development are enhanced through

[1] See resolution 55/2.

[2] Resolution S-26/2, annex.

measures that strengthen capacity-building in public health, including s
prevention of and immunization against infectious diseases,

Emphasizing that Member States have primary responsibility for stre
their capacity-building in public health to detect and respond rapidly to ou
major infectious diseases, through the establishment and improvement o
public health mechanisms, while recognizing that the magnitude of the
response may be beyond the capabilities of many developing countries,

Convinced that the control of outbreaks of diseases, particularly nev
whose origins remain unknown, requires international and regional coopera

Recognizing the need for greater international and regional coop
meet new and existing challenges to public health, in particular in
effective measures such as vaccines, as well as to assist developing co
securing vaccines against preventable infectious diseases,

Recognizing also the expertise of the World Health Organization ar
in, inter alia, coordinating actions with Member States in the areas of in
exchange, personnel training, technical support, resource utiliza
improvement of global public health preparedness and response mechan
stimulating and advancing work on the prevention, control and eradi
epidemic, endemic and other diseases, as well as the work of the Wor
Organization office dedicated to communicable diseases surveillance and r

Underscoring the continued importance of the Internationa
Regulations as an instrument for ensuring the maximum possible protectio
the international spread of diseases with minimum interference in int
traffic, and urging Member States to give high priority to the work on the r
the Regulations,

Welcoming the efforts of the World Health Organization, in coopera
Member States, the United Nations system, the Bretton Woods institut
private sector and civil society, in enhancing capacity-building in glob
health and in promoting public health at the country level,

Welcoming also the Doha Declaration on the Agreement on Trad
Aspects of Intellectual Property Rights and Public Health, adopted on 14 N
2001,[3] and noting the decision of the World Trade Organization General C
30 August 2003 on the implementation of paragraph 6 of the Doha Declarat

Recognizing the need to strengthen national health and social infrastr
reinforce measures to eliminate discrimination in access to publi
information and education for all people, and especially for the most un
and vulnerable groups,

1. *Urges* Member States to further integrate public health into the
economic and social development strategies, including through the esta
and improvement of effective public health mechanisms, in particular ne
disease surveillance, response, control, prevention, treatment and in
exchange and the recruitment and training of national public health person

decision IP/C/W/405.

2. *Calls upon* Member States and the international community to raise awareness of good public health practices, including through education and the mass media;

3. *Emphasizes* the importance of active international cooperation in the control of infectious diseases, based on the principles of mutual respect and equality, with a view to strengthening capacity-building in public health, especially in developing countries, including through the exchange of information and the sharing of experience, as well as research and training programmes focusing on surveillance, prevention, control, response, and care and treatment in respect of infectious diseases, and vaccines against them;

4. *Calls* for the improvement of the global public health preparedness and response systems, including systems of prevention and monitoring of infectious diseases, to better cope with major diseases, including in cases of global outbreaks of new diseases;

5. *Encourages* Member States to participate actively in the verification and validation of surveillance data and information concerning public health emergencies of international concern and, in close collaboration with the World Health Organization, to exchange information and experience in a timely and open manner on epidemics and the prevention and control of emerging and re-emerging infectious diseases that pose a risk to global public health;

6. *Invites* the regional commissions of the Economic and Social Council, as appropriate, to cooperate closely with Member States, the private sector and civil society, when requested, in their capacity-building in public health, as well as in regional cooperation to diminish and eliminate the deleterious impact of major infectious diseases;

7. *Encourages* Member States, as well as United Nations agencies, bodies, funds and programmes, in accordance with their respective mandates, to continue to address public health concerns in their development activities and programmes, and to actively support capacity-building in global public health and health care institutions;

8. *Requests* the Secretary-General to include observations on the issue of enhancing capacity-building in global public health in his report on the follow-up to the outcome of the Millennium Summit of the United Nations to be submitted to the General Assembly at its fifty-ninth session.

43rd plenary meeting
27 October 2003
